

## Rotarius VG

sealing

gas flushing

vacuum / gas

impulse vacuum

### Semi-automatic Tray Sealer with Turntable

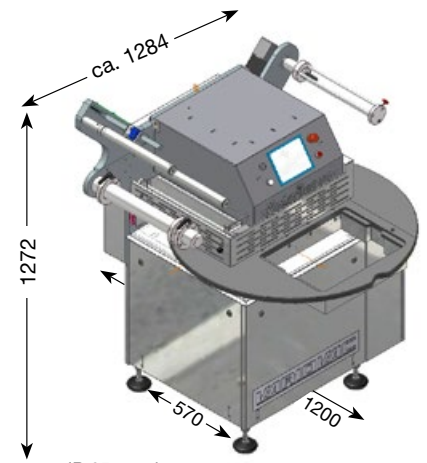

- higher productivity in comparison to the conventional drawer-type tray sealer
- O<sub>2</sub> security valve inclusive
- simple changing of dies for different tray size
- continuous working process
- small footprint
- perfect product presentation

## Technical Data:

control:	handling via touch screen
electr. connection:	3L/N/PE, 400 V/50 Hz, max. 7 kW
compressed air:	6 bar / 28 ltrs per min.
cycles:	4 – 8 cycles/min., depending on tray size vacuum / gas / seal
vacuum pump*:	63 m <sup>3</sup> /h, integrated (opt. 100 m <sup>3</sup> /h)
pneumatic*	
film roll:	Ø max. 300 mm
total weight:	approx. 450 kgs.
space required:	1,6 m <sup>2</sup>

\* We only install parts of renowned European manufacturers

IP 65 rated  
Subject to technical alterations  
Made in Germany

## Rotarius VG

Great flexibility is given due to the fact that the **Rotarius VG** seals trays made from all kind of different material (PP, PET, PS, aluminium and laminated carton). The chosen lidding film must correspond to the characteristics of the trays.

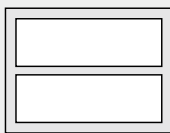

For better product presentation you can also employ **printed lidding film** on the **Rotarius VG**. Changing from one tray size to another is done easily and **without any tools**.

The manual turntable enables high efficiency: whilst the exchange of atmosphere is made in the sealing- / cutting station, the sealed and contour cut trays can be unloaded and new filled trays placed into the loading / unloading station. Residual film will be automatically coiled and removed.

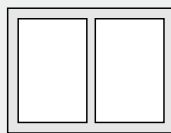

max. tray sizes in mm; max. height 100 mm

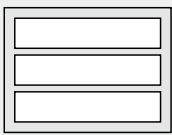

406 x 294

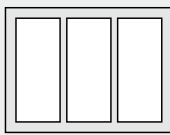

406 x 137

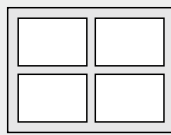

190 x 294

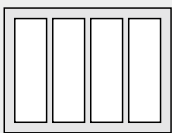

406 x 82
